

# Termination Block

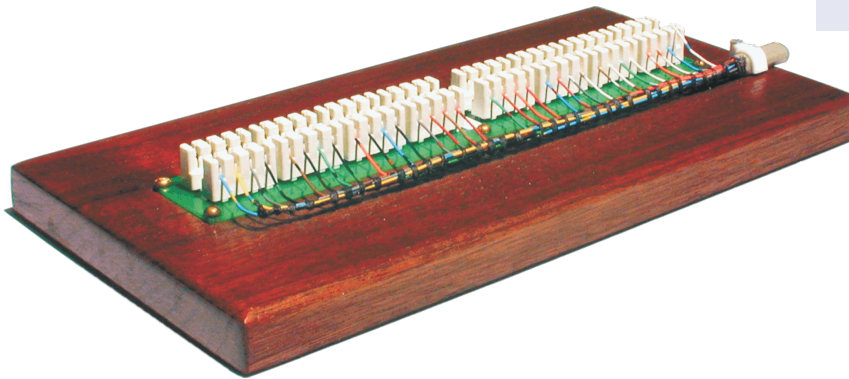

## *Your chance to be the fastest wirer in the West*

Pin-boards and solder joints do look professional. But think of the time they take to make. Think, too, of crouching in corners with a hot iron. Or yanking it all off again to make a change.

Next time, think about SSOS's 32-way Termination Blocks. Instead of cutting wires to length, stripping wire-ends, wrapping them onto pins and soldering away, just lay the wires into Krone Blocks and punch them in with the special tool.

Job done.

- *Use them like a pin-board or individually*
- *Proven in corrosive and salt-laden air*
- *Rugged and vibration-proof*
- *Blocks in groups of 4 for easy testing and counting*
- *Speeds up wiring by up to 20 times*

## *Connect, disconnect and re-connect*

One other advantage of Termination Blocks is that wires can be inserted and removed up to 100 times without damage. So feel free to test a chest or system on the bench, re-connect it on site and re-route its wiring at will.

SOLID STATE ORGAN SYSTEMS  
4900 SEMINARY ROAD, SUITE 560, ALEXANDRIA, VA 22311 USA
