

DIRECT CONNECT

The slider solenoid control system for each and any solenoid.

Solenoids shift slides and couplers in all kinds of organs. Some must move swiftly, some gradually. They're powered briefly, but occasionally all the time. DirectConnect can control them from one single point.

"Rather than
blind you with science,
we'll just help you build
brilliant
organs."

Options

Four kinds of DirectConnect cards are available.

Dual Slider for normal slider soldenoids.

Dual Coupler for the "pull and hold" couplers

Dual Registration for mechanical stop linkages

Dual Luminous Stopkey Control

Features
