

CAPLITE 2.0

The stand-alone user-configured capture system that's painless to install, program and pay for. Organists are expecting more and more, and Caplite offers full featured specifications with savings in cost, time and space. Ready to be configured to your project, its big power and small size are a winning combination!

"Rather than
blind you with science,
we'll just help you build
brilliant
organs."

Control

Take control of up to 96 stops. Choose 10 levels of memory with a rotary switch or 100 levels with a handsome alphanumeric TFT display in a quality cast metal bezel. 24 General piston inputs and 48 Divisional/Reverser inputs are free to be assigned as needed. The integrated piston sequencer lets the organist step through the General pistons in order.

The Standard for Pipe Organ Control

CapLite is a fully configurable capture system for up to 64 or 96 stops in a small package and a small price.

Case dimensions 631 x 240 x 65 mm 24.8 x 9.5 x 2.53 Inches

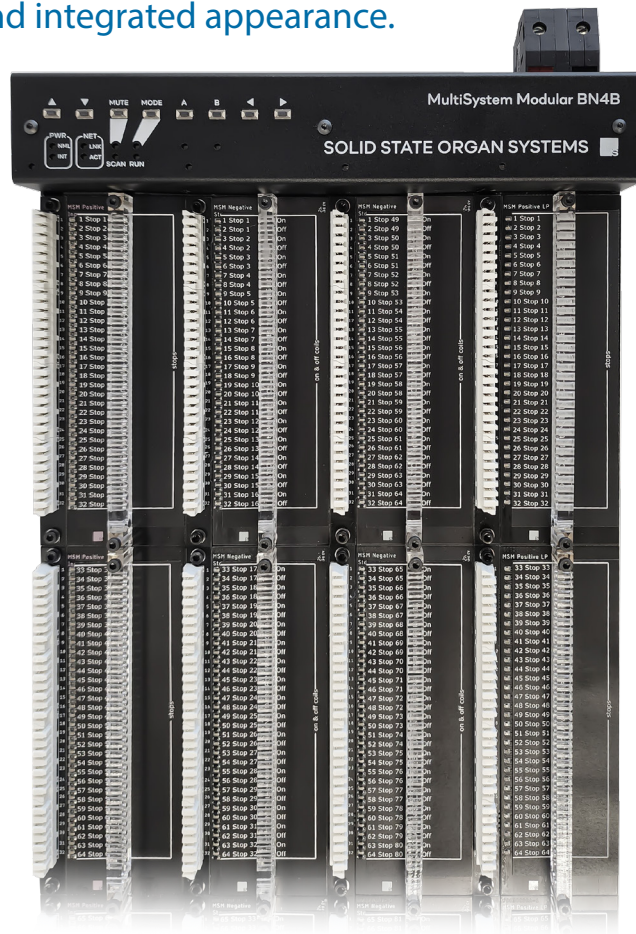

Displays

Both the 10-way rotary switch and the alphanumeric TFT display are mounted on a rugged, cast aluminum bezel for easy installation. The optional TFT Keyslip display may be installed without bezel for a very clean and integrated appearance.
