

POWERLIGHT

The only power supply for organ builders, safety inspectors and weaklings. That's the snag with power supplies. Many cope with demands yet don't meet electrical standards. Some meet standards, but can't cope with surges. Some perform, but weigh a ton.

"Rather than
blind you with science,
we'll just help you build
brilliant
organs."

Failure Free

No matter how much an organist abuses the organ, PowerLight carries on working. Circuits continuously check power demand and reduce the voltage to maintain the current. Change every stop and play a massive chord in one go and PowerLight won't trip out.

Features

- 15 to 90 amp output
- Variable DC voltage output
- 110VAC or 230VAC
- Up to 28VDC out
- UL and CUL listed
- Ultra clean DC
- Current limit
- Thermal overload protection
- Lightweight
- Affordable
