

# MUCAP

*THE stand-alone piston system for any pipe organ. The Solid State MultiLevel Capture Action has been the workhorse of capture actions for over 25 years. With constant feature updates "MuCap" is still the most advanced and robust system available.*

"Rather than  
blind you with science,  
we'll just help you build  
**brilliant**  
organs."

## Options

MuCap is available from 8 to 999 levels of memory in standard format or virtually unlimited levels when used with Organist Palette. A panoply of player's conveniences from piston sequencers to settable reversers are freely available. Existing MuCaps are upgradeable with the new M3 processor card.

## Control

Our rugged alphanumeric display mounted on a quality, cast metal bezel is standard on all CFM's. For a cleaner look we offer the Mini Display which is just the alphanumeric display. All control buttons such as memory Up/Down are available as piston inputs. It is easy to assign multiple organists their own levels with Organist Palette. Fully programmable Crescendo and Tutti are standard.

# The one capture system for more than one player

## Versatile

No two organs are the same. There again nor are two organists. It's why Solid State make MuCap systems in a selection of sizes, customized to a specific specification. Each one, or course, can be added to later. Rest assured, the largest most complex MuCap is as straightforward to install as the most basic.

## More Options!

Total Recall piston backup to USB option may be added at any time. Solid State's Advanced Sequencer with piston Insert and Delete function is an optional extra. Powerful Library Management through graphical interface on iPad makes sorting out multiple organists as easy as surfing the internet. It is easy to upgrade existing MuCap installations to current specs.

## Features

- 8-999 Memory levels
- 300+ stop capacity
- Divided General and Divisionals
- Piston Sequencer
- Four Programmable Crescendi
- Organist Palette friendly
- Completely upgradable
- Choice of displays
- Krone connectors
- PIN locking
